INTRODUCING a new a tool in the battle against weeds:

WEED OUT[®] ULTRA PROFESSIONAL

Evergreen Bio Innovations is thrilled to introduce WEEDOUT[®] Ultra Professional, a highly effective weed control solution with long-lasting effects due to its systemic mode of action. WEEDOUT[®] is based on a natural plant hormone found in peas and broad bean plants. This innovative product is designed for spot-treatment application, allowing users to target small patches and individual broadleaf weeds.

WEEDOUT[®] is particularly effective against hard-to-kill weeds such as plantain, creeping charlie, hawkweed, cinquefoil, and black medic. WEEDOUT[®] is a reliable tool for maintaining weed-free landscapes.

- ✓ Systemic mode of action to kill down-to-the-root* for long-lasting results.
- ✓ 96% mortality on broadleaf plantains, 82% on dandelions.
- ✓ Concentrated solution adapted to lawn care professionals.
